Profile

As a Computer Science graduate with experience in web development, I focus on building functional and scalable web applications. I prioritize clean, maintainable code and user-friendly designs that meet both business and technical needs. I have experience with modern web technologies and seek to improve my problem-solving skills.

Professional Experience

Junior Software Developer,

Simplex Software & Internet Services Ltd

October 2023 – present | Limassol, Cyprus

- Led the development of multiple web applications using **Node.js** and **React.js**, including websites with integrated administrative systems.
- Contributed to the **company's payment platform**, handling final development tasks before testing and deployment.
- Maintained and enhanced **PHP-based websites**, fixing bugs and improving functionality.
